

Sanitation Standards for General Foods

Article 1

This Standard is prescribed in accordance with the provisions of Article 17 and the second paragraph of Article 15 of the Act Governing Food Safety and Sanitation (herein referred to as "this Act").

Article 2

For foods which have their own sanitation standards, those standards shall be applied to the respective foods.

Article 3

Foods being sold shall have normal and reasonable acceptable traits, flavor and color. No discoloration, off odor or flavor, abnormal clot or precipitate, contamination, visible moldy, foreign matter, insects or parasite can be permitted; because of bad hygiene, poor quality or improper processing process control.

Article 4

The maximum levels of metals, mycotoxins, other contaminants and toxins in foods, except as foods which have their own sanitation standards, shall meet the "Sanitation Standard for Contaminants and Toxins in Food".

Article 5

(Delete)

Article 6

Water for food production:

1. Water used in the production of food grade ice cubes, beverage, bottled and packaged drinking water shall meet the requirement of "Drinking Water Quality Standards" set by the competent environmental authorities.
2. The maximum levels of bromate in bottled and packaged drinking water shall not be more than 0.01 mg/L.

Article 7

The caffeine contents of packed beverages:

1. Caffeine contents of tea and cocoa shall not exceed 500 mg/L.
2. The beverages other than tea, coffee and cocoa, caffeine contents shall not exceed 320 mg/L.

Article 8
